

Make Change Associates was originally founded in 2004 as a private training provider delivering to the public and private sector in the UK. We have now developed a wide range of qualifications which can now be offered online through distance learning. MCA Ltd is a registered centre with a number of awarding bodies, including Edexcel (BTEC) and NCFE.

Candidates are able to start at lower levels and work themselves up or if already qualified, they can get straight into their desired courses. We also have some additional short courses which you may be interested in doing in addition to your course.

We have established links with professional bodies and Australian colleges to be able to expand our offer. Our candidates will experience a high quality of teaching and learning to ensure they are successful in their goals. We offer our students regular feedback on their progress whilst they are on program with us which gives them confidence and paves the way to success.

Our offer also extends to consultancy services to individuals and organisations looking at improving individual/employer skills in the workplace.

Day by day we are working to build an education portal that is both useful and accessible, helping to cultivate today's inspiring minds into tomorrow's future.

All our courses are offered to local and International candidates who look for a more flexible approach to their learning.
